

Quick Start Guide for Software Installation for Control Solutions BB2-2010, BB2-2011, BB2-6020 Configuration Tool

(1) Go to www.csimn.com to download the software support package if you do not have the CD handy. From the home page, click the Network Gateways graphic, or select Network Gateways for LonWorks from the Products menu. Select any of the above models (click its 'more' button), and then click the Support CD link in the left hand column below the picture and bullet list for the product.

BB2-LON_Setup.exe

(2) Double click the BB2-LON_Setup.exe program. This will start the installer which installs the configuration tool program as well as compiled help files. Grant permission for the installation to proceed as required by your version of Windows. After installation is complete, open the BB2-LON program, and click the blue icon in the top left corner of the screen for additional help.

csimnUSB.zip
1,546 KB

(3) Unzip the contents of the csimnUSB.zip file to your desktop or documents directory. Installation instructions will be found in a pdf file included in the zip file. In general, simply click setup.exe. The USB drivers required for connecting your PC to the Babel Buster gateway will be installed for Windows XP, Windows 7, or Windows 8. **IMPORTANT:** Windows will not automatically find the correct driver for this device. If Windows thinks it found a driver on its own, the installation included here will uninstall the incorrect driver first.
