**FREE WEBINAR OFFERS TIPS ON HOW TO CASH IN
ON NEW U.S. STIMULUS PACKAGE WITH HVAC ENERGY SAVINGS**

DIAMOND SPRINGS, CA, September 8, 2009 - A 38-minute webinar that gives new information on federal tax incentives for energy efficiency upgrades and retrofits in commercial buildings is now accessible online at www.legacychillers.com. The webinar, entitled "*New Opportunities in a Challenging World*," is a live webcast held every Wednesday of each week. Registration is free.

Led by **Martin King**, Senior Fluid Systems Designer for **Legacy Chiller Systems**, the webinar addresses how medical imaging centers, semiconductor centers, mechanical engineering consultants and others can reduce KWH up to 60 percent and receive up to \$1.80 SF with chiller economizer technology, under the U.S. Stimulus Package.

The webinar uses research and graphics to present what energy industry leaders are saying about HVAC energy conservation and carbon footprint reduction. This information affects building owners, engineers, property managers, mechanical contractors and other decision-makers.

The webinar also provides links to free, online HVAC design tools and online, real-time HVAC case studies.

Legacy Chiller Systems provides advanced solutions for mission critical applications in Fortune 500 companies nationwide. To register for the webinar, click on
